

## **PRESS RELEASE**

### **Redding Rancheria Tribal Government Releases Impact Study on State & Local Economy**

*The Redding Rancheria has provided substantial impacts to local and regional economies*

#### **For Immediate Release**

December 2, 2020

(Redding, California) — The Redding Rancheria is excited to share with you the completion of a new study conducted by Beacon Economics, a leading independent economic research firm. The analysis shows that the Redding Rancheria has provided substantial impacts to local and regional economies. The report analyzes the impact of the Redding Rancheria and its Casino on the economies of Shasta County, the 1<sup>st</sup> Congressional District, and California. It discusses economic, fiscal, and social contributions to these regions in 2018.

The Redding Rancheria has and continues to generate tremendous economic activity, support numerous full-time jobs and produces significant tax revenue to support our state, regional and local government activities. The Redding Rancheria has donated millions to local business and charities. The Redding Rancheria Community Fund has donated over \$3.5 million since 2002 to Shasta and Trinity Counties. We are grateful for the support of the community.

Additional information about the project plans can be found at [www.reddingrancheria-nsn.gov](http://www.reddingrancheria-nsn.gov)
