

Do It Now... Avoid Surprises, Don't Wait Until The Need Arises!

Ergonomic Evaluations

It's important that your work station fits you! There are many steps we can take to make a work station more comfortable for most employees. If you are experiencing some set up problems please contact our Safety Manager, Lia Earnest at 242-4596 or at learnest@reddingrancheria-nsn.gov

Hazard Communication

Have you found the Right-To-Know station for your work area? It's important to know the chemicals you work with and self protection requirements before you use them. Ask your supervisor or those you work with to review those chemicals you may be exposed to during the normal course of your work day.

Emergency Procedures Manual

It's the "how to do what needs to be done in an emergency manual"... have you located the Emergency Procedures Manuals for your building? Do you remember the codes and what they mean and how you should respond? If not, DO IT NOW!
